

Covid-19 Antigen Rapid Test

Accurate*

Sensitivity : 95.07%

Specificity : 99.74%

15 Minutes Detection Time

Medakit Antigen Rapid test device is an in vitro immunoassay. This assay is for the direct and qualitative detection of SARS-CoV-2 viral nucleoprotein antigens from nasopharyngeal and oropharyngeal secretions.

Introduction

Medakit Ag Rapid Test

The Medakit Antigen Rapid test is a game-changing diagnosis solution that allows a qualitative and direct diagnosis of an active Covid-19 infection within 15 minutes. This solution is massively scalable, cost effective and highly accurate.

Advantages

1.

- Detects an active infection
- Easy to use
- No extra equipment required
- Rapid detection within 15 Minutes
- Room temperature storage

2.

Incredibly fast

It takes less than 2 minutes to administer the test. Results are available within 15 minutes

3.

Accurate

A Clinical evaluation on 585 samples confirmed a sensitivity of **95.07%** and a specificity of **99.74%**

4.

CE Marked

This test can be used in the European Union

Medakit can currently produce up to 800,000 antigens tests per day.

Easy to use procedure

Comparison with PCR

	Antigen Rapid Test	PCR Test
Testing Time	15 minutes	>1Hour
Equipment Requirement	NO special equipment needed	Professional PCR equipment needed
Operation	Use according to the instruction	Requires trained technicians
	Easy to use	Complicated operation
Transport/Storage	Room Temperature	Cold-chain
Positive test result mean	Active Infection	Active Infection
